Education

Secondary School

2016 - 2018

Libya, Tripoli, AL-Fernaj

I studied at Al-Asma'a Secondary School in Tripoli.

Electronic Technology College Tripoli, Software Engineering Department 2018 - 2024

I graduated from the Software Engineering department, and my project was titled "Facial Recognition Payment System." It is an electronic payment platform that uses facial features and includes comprehensive management for accounting matters, management for shipping platforms, as well as full management of all stores that provide this service, along with many other functions.

Professional Experience

ET StudentUnion

2023

Libya, Tripoli

The Electronic Library project aims to create a comprehensive educational platform for students at the College of Electronic Technology in Tripoli. The library provides access to curricula for all departments and academic levels, as well as a wide range of questions and useful applications for training and professional development. I was one of the programming team members responsible for designing the user interfaces. the link: library.cetsu

Al-Zad Electronic Company

2023 - 2024

Libya, Tripoli, Abu Sitta

Working efficiently within a team is vital for the success of any project, as it requires continuous interaction and effective communication among members to achieve common goals. Learning Laravel is an important step in my professional journey as a web developer, as this framework provides a wide range of tools and features that facilitate the development of modern web applications.

HB Group Company

2024 - Present

Libya, Tripoli, Abu Sitta

I have worked on several projects for various companies on how to use the Odoo ERP system, contributing to enhancing business efficiency. I have effectively utilized the advanced tools in Odoo, such as analytics and reporting features, assisting in making informed decisions. I designed and developed the website for Al-Wissam Al-Dhahabi Company, focusing on enhancing user experience and providing an attractive and user-friendly interface. [Visit website](#)
